Definition of Collective License:

One license is based on the meaning of your position from the internal perspective of the collective, which is directly responsible or participates in the contribution or problems specific to the given collective.

Think of the collective as a group of people created for a certain interest or purpose, and as a result adopting the benefits or, on the contrary, directly arising problems, corresponding in terms of evolution and the responsibilities associated with it.

In general, these groups are formed from the direction of profit as concerns, holdings or unions, states or as:

- **disposing of the funds obtained from the activity that caused these problems, will be divided**
- holding, concern, company, subcontractor, etc. as a profit-making group and thus directly responsible for the given problems

Then:

- Union, State group, state, region, district, city, municipality as groups that have relevant competences and problems that are not solved by the nature of the position or in any way disregard and fall under their competences (e.g. Parliament, House of Representatives, Politician)
- Associations, societies, scientific groups, or any other group responsible for problems of a specific nature known to them (e.g. CERN, Power Plants, ...)

The number of licenses is then purchased as follows corresponding in terms of evolution and the responsibility associated with it contributing to the spirit of evolution of the 21st century as:

- Profit-making groups and related problems where the license corresponds to the nature of data management, as an independent or separate system X the number of places where they are operated (Branches, etc..)
- Groups or a group or an individual paid from the profit or responsibility arising from the responsibility of the Company and the states that created the given problems or have the financial resources or want to acquire a license for the purpose of creating it, and that for each smallest closely cooperating team (independent scientific teams, liquidation squads , a group of developers) or other groups afraid to share the data content as a whole stored in it
- Groups intermingled with the above-mentioned groups receiving funding such as sports clubs, subsidized associations, private schools, artistic School and other associations based on financial greed or income-generating nature are divided into:
 - The number of licenses according to the extent of financial resources of sports clubs up to a license for a personal henchman,
 - 1 license for: School, artistic School, interest group or other independent group existing in the sense of generating profit only for itself
 - Group, Entrepreneur demonstrably creating profits exceeding expenses in the sense of independent subsistence ()

You get right to:

- Use the Software for any purpose
- Create derivative works from it (this is called a "Derivative Work")
- Copy and distribute it and any derivative work.

There are a few things you need to take care of:

- You get NO WARRANTIES. None of any kind
- If the software damages you in any way, you can only recover direct damages up to the amount you paid for it (that's zero if you paid nothing). You may not recover any other damages, including what are called "consequential damages." (The state or country where you live may not allow you to limit your liability in this way, so this may not apply to you)
